CAREER OBJECTIVE

As an experienced WordPress developer with a proven track record in creating and designing websites, as well as a freelance software developer specializing in marketplace development, my career objective is to leverage my skills and expertise to contribute to a dynamic organization. I am seeking a challenging role where I can utilize my proficiency in development, custom coding, e-commerce implementation, and marketplace creation to drive impactful solutions for clients and users.

WORK EXPERIENCE

WordPress Developer

Must Uba

📅 August 2022 - May 2023   📍 Estonia

- Creating visually appealing and user-friendly website layouts using WordPress themes and plugins.
- Writing and integrating custom code snippets or plugins to meet specific client needs.
- Setting up and configuring e-commerce plugins, such as WooCommerce.
- Gathering requirements from clients and understanding their business objectives to create effective website solutions.
- Exploring new plugins, tools, and techniques to enhance website functionalities and user experiences.

PROJECTS

SuperTurg Marketplace (ongoing)

Freelance Software Developer

- Creating a scalable and robust architecture for the marketplace, considering factors such as user management and product listings.
- Writing clean, efficient, and maintainable code to implement the marketplace features and functionalities.
- Building user-friendly interfaces for sellers and buyers, including registration, login, profile management, and product listing pages.
- Developing an intuitive admin dashboard to manage user accounts, product listings, transactions, and site settings.

CERTIFICATIONS

- Certificate in Advanced English - C1 - University of Cambridge
- Introduction to Programming - University of Tartu
- CS50 Introduction to Computer Science - Harvard University
